HSSE

14th March 2024

10:00 – 15:30

HYBRID: ONLINE / CREWE

Member Rates		Non-Member Rates	
Online	£120 + VAT	Online	£250 + VAT
In Person	£140 + VAT	In Person	£300 + VAT

The storage of chemicals in warehouses is a process that looks relatively simple on the surface. However, it is very much akin to an iceberg with an ever increasing complexity under the surface.

Clients often provide limited information and expect rapid answers which could easily leave a company exposed to additional costs, increased operational complexity and higher risks of serious incidents that may lead to business closure.

Whilst many logistic providers will employ a Dangerous Goods Safety Advisor (DGSA) under the transport regulations, these may not be fully conversant with other regulatory regimes and could easily overlook a vital regulatory provision, leaving a company vulnerable

This course is designed to provide a basic insight into specific legislation that is applicable to the storage of chemicals

The workshop is suitable for all levels of personnel requiring a practical knowledge of chemical handling – including regulatory compliance specialists.

It will be useful to those specifically responsible for performing risk assessments and those who handle chemicals generally

The workshop provides a basic insight into the warehousing of chemicals including:

- ✓ **H, S & E legislation**
 - **Flammables (DSEAR)**
 - **COSHH/Segregation**
 - **Work at Height**
 - **Manual Handling**
 - **Waste**
- ✓ **CLP vs ADR**
- ✓ **Safety Data Sheets**
 - **What do they tell you?**
- ✓ **REACH impacts**
- ✓ **Major Hazards (COMAH)**
 - **Anticipated presence**
 - **Performance Indicators**
 - **Asset management**
- ✓ **Workplace Transport**
